Mr Camr then said that he pledged himself to vote for Haveneyer as Mayor, if—(The rest was lost) for Haveneyer as Mayor, if—(The rest was lost) has the characteristic of the theorem of the democracy of New York is usguestionably great, and it is especially important that that in flamene should be felt at the present time, so far as the general administration of the country was concerved. It is right and proper when that administration is assailed, that the democracy of New York she wils speak out. Since it came into power, it has been obtiged to rustain the honer and glory of the cetuarry against an aggressive assion, and conduct the cetuarry against an aggressive assion, and conduct the administration throughout! When the whip party placed the new year the administration throughout! When the whip party placed the new we have striven to thwart the administration throughout! When the whip party placed the new we have striven to the warth of the control of the party who now have them one of which is the present revolutionary state of Europer; ano her time is a considerations why the relans of eventual about he held by the party who now have them one of which is the present revolutionary state of Europer; ano her time is a proper time of the party who now have the only right that there should be a good democrate Common Council in power here to give him a suitable reception. We have had a whig reception and calebration her, within a short time, and it is no more than right that there should be a good democrate Common Council in power here to give him a suitable reception. We have been a well-great that the country, how New York will act this spring; but it would be just as abund to doubt that New York will defend the propect that awaited them, and believed that it has been asked in different parts of the country, how New York will act this principal to the country how here the propect that awaited them, and believed that it has been defended by the country have sufficient to assure them that the city will be long t more grape and finished their business? We are in hat condition. The ensuing election is the altimish and this is the time when we nee! and must have a little more graps; and if we get it, we shall scatter the Mexican whigs on Tuesday, as Captain Bragg did at Buena Viata. Before concluding he wished to remind the nerives of Ireland that they have an important duty before them. The whigs gave an elegant reception to Mr. Clay for an electioneering purpose, and he wished to remind them that in May next Fasher Matthew is to arrive on our chores; and shall he not be received by a democratic Common Council, who will give him a reception worthy of this great country? If the whig party had a reception, for a political candidate, let us extend our greetings to the friend of humanity. We shall extend our greeting to the friend of humanity. We shall extend our greeting to him or to a Lamartine; let the whigs prepare a reception for Louis Philippe.

On motion, the meeting then adjourned, after giving three cheers for the democratic nominations.

STEAM COMMUNICATION BETWEEN New YORK AND BERMUDA.—We are happy to be able to announce that the Deputy Postmaster General of these lelands has received authentic information from England of the intention of the Royal West India Misi Steam Packet Company to run one of their first class steamers, once a month, between Bermuda and New New York. This new arrangement will take effect from and after the lat of May next. It is well known that in every monto, since the new route of steam communication between England and New Orleans (via Bermuda) was entered upon, one of the company's steamer's has lain in port, at these Islands, for a fortnight, entirely unemployed—waiting to convey to St. Thomas the mails for the Windward and Leeward Islands, which are brought here in the steamer direct from England. The attention of the company having been invited, as we learn, to the leasability of employing the St. Thomas steamer, during that fortnight, between Burmuda and New York, without in the least disarranging their plan of communication already in existence—they concurred in the view so presented, and have decided upon the arrangement. The following extract of a letter, dated London, March 1st, received at the General Post Office. St. Georges, supplies definite information as to this time of the steamer's departure for New York, and its return to Bermuda, together with the rates of postage on letters and newspapers:—'On and after the lat of May next, a monthly communication will be established between the West Indies and the United States, by the vassels of the Royal Mail Steam Packet Company, which will convey mails between Bermuda and New York, leaving Bermuda at 6, A M, on the 7th of each month, and returning to Bermuda at 4, P. M., 16th. Postage on letters and the West Indies and the United States, by the vassels of the Royal Mail Steam Packet Company, which will convey mails between Bermuda and, the Descage on letters and newspapers.—'On and after the lat of May next, a monthly communication will be established between

Sympathy with the French Revolutionists.—At Buffalo, on the 4th instant, a grand demonstration of sympathy with Republican France was made. The Buffalo Express sale:—The turn-out was very large, Mala street, as the procession moved down, to all appearance, was a living mass; and when the multitude arrived in the vicinity of the liberty pole, the point designated for the organisation, the area was densely filled with people, and Main street, as far as the eye could reach, was crowded. The meeting having organised, an address and resolutions were read in the French, English and German languages. These were received with loud accismations. After quiet was rectored, the Hon. H. K. Smith was introduced to the assemblage and addressed it in a patriotic strain. He was followed by the Hons. S. G. Haven G. W. Cilnton, and S. C. Havley, Esq. when the vast gathering dissolved again, amid shouts, huszas, and cries of "vive is Republic." The stripes and stars, and the tri-color, fineted together on the liberty pole, and during the day, flags and streamers decorated most of the shipping is port. Booffree lighted up the scene on Main street at intervals, from the liberty pole to Genesce street, during the evening, and tokens of rejoicings were every where to be seen and heard.

Fire—Great Destruction of Property.—About 4 o'clock this morning, a fire was discovered in the freight d-pot of the Boston and Maine railroad. The fire had made entel progress that it was impossible to arrest it, and the building, with nearly all its contents, were destroyed. There was an unusually large amount of valuable freight in the depot, and the loss must be great though it is impossible to give an estimate, the way o'lile being dearryed. We undestand that the Cochesche Manulacturing Company had twenty cases of goods in the building, seven or eight cases of which were saved in a damaged state. The fire is supposed to have originated in a pile of woollen waste, belonging to the Norway Flains Manufacturing Company We are sorry to learn that Mr. C. C. P. a cess, paper manufacturer, of this town, has lost a large amount of paper, which was to leave this morning by the cars. MURDER BY A NEGRO.—The Port Gibson (Miss) Herald of the 24th ult., narrates that on the preceding Monday, a negro man came to Mr Beone, who had a flatboat at the landing and stated that he belonged to John Brocus, of this county; that he had the day previous killed his wife, and had come to currender himself to justice. On examination he stated that his wife's conduct had aroused his justicus, and told his story without hesitation, and did not seem at all agitated." It is very remarkable, adds the Herald, that this is the second negro who has committed murder in this county within a month, and has thus voiuntaity surrendered himself to justice; the first being a negro of Mr Dotson's, who murdered his master's overseer, Mr Bagnell."

The steamer Washington was telegraphed this forenoon at about 15 minutes past 11, having sailed from
Southamoton on the 21st uit. As soon as it be-came
known that she was below, transactions in cotton
and breadstuffs were in a measure supended. Change
met at 2 to 2%, P. M., before her news had been published, and hence very little business was done, merchasts preferring to wait until they received their letters. The news, in an Extra Herald, was laid before
the public at an early hour; but the day was so far advanced, that its effects on this market were not perceptible, and could not be developed until the following day.
The few sales of flour made were effected at about
previous rates. There was no wheat offering, and
neither buyers nor sollers were disposed to move until
they had time to digest the news. Corn continued firm,
and helders were inclined to ask better prices. Meel was
steady, Rye experienced no change. Provisions continued about the same, while transactions were moderate.
Sugars were steady, with a fair amount of business
doing. Coffee continued quiet, without material change
in prices.

Ashes.—The market was at a stand, on account of the
news. Sales of 100 bbls. Pots were made (of 1847) at

PORRIGN MARKETS.

Demperara, March 12, 1948 — Business continues duil. There has been no improvement in the retail trade; the scarcity of money presses severely on all branches of commerce, and particularly upon dry goods. The contraction of the circulation, by prudential measures of the banks limiting their issue, and the very small amount of money paid by the planters for labor during the past two months, has almost put a stop to the sales of any importe, except those of absolute necessity, and present prospects hold out no hope of a speedy improvement. The quantity of exports coming in is very limited, and few purchasers can be found, even at our low quotations, in consequence of the difficulty of negotiating drafts upon Great Britain for specie.
